-
- **Current Lead AI FDE (AI Agent Lead):** lead a 3-person team, translating executives' business needs into deployed technology and setting the development direction
 - **AI agent systems in production:** human-in-the-loop guardrails, meeting-notes → agent → GitHub pipeline
 - **#1 in client communication & troubleshooting:** ranked #1 on the team across all metrics (SRR 92.7%, 0% dissatisfaction) in MS M365 enterprise technical support
-

Experience

Korea Institute of Business Analysis (한국경영분석연구원) | Lead AI FDE 2026.05 - Present

- **3-Role Orchestration:** Designed a collaboration loop connecting non-developer clients (intent), AI agents (execution), and verifying developers — agent work made clear enough for non-developers to drive, developer judgment encoded as explicit policy.
- **Human-in-the-Loop Guardrails:** Agent actions branched by type — reads run automatically, board writes need per-item human approval, deletions/permissions/code changes are prohibited. Meeting notes kept private, PII masked before commits.
- **Claude Code + GitHub Pipeline:** Asynchronous flow from meeting notes → AI agent → board (Issues/PRs). Migrated Plane → GitHub Projects on a build-vs-buy call.
- **Product from Planning to Deployment:** Built 'Quali-fit', a certification-based staffing recommendation system scoring "who to assign, and why".

Concentrix Korea | Technical Success Advisor 2025.08 – 2025.11

- Achieved a 5.0 average rating, 0% dissatisfaction, and a 92.7% Service Request Resolution (SRR) rate among 20+ engineers (#1 across all metrics)

FPT Software Korea | Embedded Software Developer 2024.09 – 2025.07

- Deployed automotive security modules in partnership with Hyundai AutoEver

Gamasot Online English | Founder & Operator 2018.05 – 2022.05

- Founded and ran a video-call English education business for 4 years; built Unity-based learning games as the sole developer and iterated the product on direct user feedback
-

Education

- **École 42 Seoul** — Computer Science (2022.10 – 2024.10)
 - UNIX systems, network programming, self-directed problem-solving projects
- **Pukyong National University** — B.S. in Industrial Engineering (2007.03 – 2014.02)
