SUMMARY

I am an AI Technical Product Manager and Cloud Solutions Architect who turns C-level business goals into working software. By building scalable Kubernetes (k3s) environments and LangGraph AI agents, I help engineering teams work faster and smarter. My main role is to act as a shield for engineers, stopping scope creep and translating business needs into clear daily tasks.

EXPERIENCE

AI Technical Product Manager

Korea Institute of Business Analysis & Development | Seoul, South Korea | May 2026 - Present

- Translate C-level business goals into clear technical tasks for AI automation.
- Act as a shield between executives and engineers, managing the backlog to save time and block scope creep.
- Lead and train an engineering team to build LLM agents using LangGraph and data pipelines.
- Built and launched 'Quali-fit', an internal HR and recommendation system that instantly improved work speed.

Full-Stack Cloud Infrastructure Owner

Bithabit | Seoul, South Korea | Aug 2024 - Present

- Moved 12+ older services into one k3s cluster, making the system 100% independent from host servers.
- Set up secure network routing with Traefik and cert-manager, automating TLS security.
- Cut cloud server costs by 40% while keeping all services online and easy to scale.

M365 Technical Support Engineer

Concentrix (Microsoft Support) | Seoul, South Korea | Aug 2025 - Nov 2025

- Ranked #1 out of 20+ engineers with a 92.7% success rate by solving hard MS Entra ID and cloud migration problems.
- Created the 'Fireteam' study group to level up the team's tech skills, and worked as a MS Global Tester.

Embedded Technical Support Engineer

FPT Software | Seoul, South Korea | Oct 2024 - Jul 2025

- Fixed hidden system errors using memory reverse-engineering and low-level network debugging.

SKILLS

AI & Product Management: Technical Product Management, Requirements Translation, LangGraph, LLM APIs, Prompt Engineering, MLOps Pipelines **Cloud & Infrastructure:** Kubernetes (k3s/K8s), Docker, Oracle Cloud Infrastructure (OCI), AWS, Traefik Ingress, Terraform (IaC), CI/CD **Development & Systems:** Python (Expert), C/C++, Unix Shell Scripting, SQL, Git Workflow (Conventional Commits, Semantic Versioning)

EDUCATION

Computer Science & Software Engineering

École 42 Seoul | 2024

B.S. in Industrial Engineering

Pukyung National University | 2014
