

Gichan Lee

Forward Deployed Engineer | AI Integration & Infrastructure

+82 10-6666-2824 | gichanlee@icloud.com | [linkedin.com/in/bookseal](https://www.linkedin.com/in/bookseal) | github.com/bookseal | bit-habit.com

SUMMARY

Results-oriented **Forward Deployed Engineer** and Technical Master specialized in operationalizing production-grade AI systems. Ranked **#1 Performer** at Microsoft Support (92.7% SRR, 0.0% DSAT), recognized for resolving mission-critical enterprise blockers through deep system analysis and consultative integration. Expert in building **Agentic AI systems (LangGraph)** and deploying resilient, API-driven architectures on **cloud-native platforms (k3s)**.

TECHNICAL SKILLS

- **AI & Integration:** Generative AI Agents (LangGraph), LLM Orchestration, RAG, REST APIs, JSON, Python, JavaScript.
- **Cloud & Deployment:** Kubernetes (k3s), Helm, Oracle Cloud (OCI), AWS, Docker, CI/CD (GitHub Actions), Terraform.
- **Systems & Networking:** Zero-trust routing, TLS/SSL, Low-level Analysis (C/C++), Protocol Debugging.
- **Consulting:** Technical Discovery, Customer Success, RCA (Root Cause Analysis), Stakeholder Management.

EXPERIENCE

Full-Stack Cloud Infrastructure Owner (AI Integration Lead)

Bithabit | <https://bit-habit.com> | Aug 2024 – Present

- **End-to-End AI Deployment:** Architected and deployed production-grade AI services (BookToss, Daily Seongsu) on a unified **k3s cluster**, integrating complex API-driven workflows with automated self-healing.
- **System Integration:** Designed resilient communication layers using **Traefik and Zero-trust routing**, ensuring secure and low-latency data exchange between AI agents and external service endpoints.
- **Agile Modernization:** Migrated 12+ legacy services to a cloud-native environment, improving deployment agility and ensuring architectural consistency for scalable AI workloads.

M365 Technical Support Engineer (Strategic Solutions)

Concentrix (Microsoft Support) | Aug 2025 – Nov 2025

- **Outlier Problem Solving:** Ranked #1 out of 20+ engineers; achieved **92.7% SRR** by resolving complex enterprise-scale integration and identity blockers through rigorous technical discovery.
- **Trusted Advisor:** Acted as a bridge between engineering and business, translating mission-critical technical debt into manageable deployment roadmaps for enterprise-level AI and Cloud adoption.
- **VoC Influence:** Selected as a **Microsoft Global Tester**; provided direct technical RCA and AI UX feedback to MS Product Groups, influencing global development cycles and product reliability.

Embedded Technical Support Engineer

FPT Software | Oct 2024 – Jul 2025

- Resolved "undiagnosable" system-level errors via memory reverse-engineering, demonstrating the technical rigor required to debug complex hardware-software integration points.

PROJECTS

- **BookToss:** Built an autonomous **AI Agent platform** using LangGraph to automate complex search/transaction workflows via browser automation and API integration.
- **Daily Seongsu:** Developed an end-to-end **MLOps pipeline** on Hybrid Cloud, automating the lifecycle of data collection, feature engineering, and inference.
- **AI Adoption Mentorship:** Mentored a non-expert into an **AI Platform Engineer** at Upstage over 5 years, proving long-term technical leadership and effective skills transfer.

EDUCATION

- **École 42 Seoul** | Computer Science & Software Engineering (2022 – 2024)
- **Pukyong National University** | B.S. in Industrial Engineering (2007 – 2014)
